

PP-1800 ATTACHMENT

“POSTPULLER”

PATENT PENDING

A fast and **SAFE**
way to remove
shrubs and posts

THE PP-1800 POSTPULLER

THE PP-3000 POSTPULLER

The "right tool for the job" comes down to efficiency. After the PP-3000 for guard rail post, Amkin applied the design to mini skid steer units for landscaping and fencing projects. The PP1800 makes quick work of the removal. For shrubs and trees the vibrating effect removes the dirt from root ball to eliminate waste. No more digging, no more straps.

The patent pending design can capture post and base sizes from 2" to 6". Attached to any mini skid steer with a standard min quick attach system, the combination of lift and vibration makes short work of removal. From the removal of guard rail posts to shrubs, let the POSTpuller attachments make quick and SAFE work of your next project.

PP-1800 ATTACHMENT

"POSTPULLER"

PATENT PENDING

No Shovels or Straps!

AMKIN MFG, offers the next step in the POSTPULLER. Specifically for mini skid steers, now removing old landscaping and fence post. The primary goal is to provide clients and operators with a fool proof system for the removal of landscaping **SAFELY AND QUICKLY**.

Old growth shrubs, small trees, or fence post, whatever it may be, the POSTpuller can tackle the job.

QUICK WORK WITH NO MESS

THE PP-1800 MINI POSTPULLER

- Vibrating system accelerates removal
- Standard mini skid steer quick attach plate
- Standard flat face hydraulic quick disconnect
- 2450 lb impact force
- Integrated electric over hydraulic valving
- Suited for up to 1800 lb lift
- Approximately 375 lbs weight
- 8600+ LBS Grip Force
- Up To 6" Diameter
- Patent Pending

THE PP-3000 POSTPULLER

- Standard mini skid steer plate
- 3500 lbs of impact
- Electrical Duetcsh connector
- Hydraulic connections only
- Suited for 4000 lb lift
- Up to 8.5" diameter

ABOUT AMKIN

AMKIN MFG is a manufacturing group supporting American Kinetics and the AmKin family of products. Our mission is to bring about innovative products that provide inherent value to our clients operational practices and HSE programs. A company with years of history developing products from downhole tools, drilling equipment, diesel hydraulic mobile units, to disposal and recycling systems. Products built to make your business better.
